

VANGUARD II

The guardian of IT industry and server

VGS-1000/1500/2000/3000

VGS-6K/10K

Main Feature

Power Efficiency

0.9 Power Factor

Excellent real power ratio satisfies higher power density and better space design.

On-Line Double Conversion Topology

High-frequency, double-conversion topology with true sinewave output ensures filtered and reliable power support.

Fan Speed Regulation

Automatic adjustment based on load variances gives optimal temperature control with lower noise.

Advanced Battery Management System*

Precise charging base on battery condition and temperature; Ensure extensive battery life and optimal condition.

Controllable Load Segment Receptacle*

Smart power control can prioritize power distribution during regular operation and emergency.

Manual Control Friendly

Multi-Language LCD

International language LCD supports English, Japanese, French, German, Italian, and more.

UPSMON Pro Software & App Support

Comprehensive monitoring features like status display, scheduled event, and setting adjustment available through computer and mobile device.

EPO

Emergency Power Off enables imminent shutdown during critical times. Damage control achievable through minimum procedures.

DC Cold Start Function

UPS operation available with out the main power base on user needs.

Compatibility

Selectable Output Voltage

User-adjustable voltage output offers flexibility to various critical equipment needs.

Frequency Stabilizing Feature

Free Run Mode allows consistent 50/60Hz output with wide frequency range acceptance.

Monitoring Connectivity

USB, Rs232, and SNMP port provide cable and online connection from your monitoring system.

Generator Compatible

Generator Mode feature controls highly unstable input to clean power support.

Easy Battery Expansion

External battery expansion can further extend battery support duration for extensive demand.

***Only available on 1-3KVA model**
